

ENVIRONMENTAL PROTECTION POLICY

STATEMENT

All Quality Coating & Consultants Pty Ltd (QCC) activities will be performed in a manner such that proper regard shall be afforded to the protection of the environment. The minimum extent and standard of such protection shall be that necessary to comply with statutory legislation and other legal requirements.

To achieve this, QCC will:

- Assess all operations, activities and processes to identify the significant aspects of QCC's activities that may adversely affect the environment and implement procedures that manage these aspects;
- Promote work methods that prevent accidental releases and spillage's, and seek to minimise over time emissions to air, water and land that affect the environment.
- Actively promote environmental awareness to all employees and provide sufficient training to ensure the objectives of this policy are achieved;
- Establish and maintain communications with environmental consultants, contractual parties, government agencies, the general public or any other interested party to discuss environmental issues;
- Select for employment only those subcontractors and suppliers who aspire to the same environmental protection standards as QCC.

QCC will establish and maintain an environmental management system based on international standards to effectively manage and promote environmental issues. The management system will integrate with all other management systems and provide a framework for establishing objectives and monitoring environmental targets. Continual improvement of the management system will be achieved through regular monitoring of environmental performances to identify and implement improvements.
